frank@cis106:~/practicels$
```

2: frank@cis106: ~

```
      --time-style=TIME_STYLE
             time/date format with -l; see TIME_STYLE below

      -t     sort by time, newest first; see --time

      -T, --tabsize=COLS
             assume tab stops at each COLS instead of 8

      -u     with -lt: sort by, and show, access time; with -l: show access time and
             sort by name; otherwise: sort by access time, newest first

      -U     do not sort directory entries

      -v     natural sort of (version) numbers within text

      -w, --width=COLS
             set output width to COLS.  0 means no limit

      -x     list entries by lines instead of by columns

      -X     sort alphabetically by entry extension

      -Z, --context
             print any security context of each file

      --zero end each output line with NUL, not newline

      -1     list one file per line

      --help display this help and exit

      --version
             output version information and exit

      The SIZE argument is an integer and optional unit (example: 10K  is  10*1024).
      Units  are K,M,G,T,P,E,Z,Y,R,Q (powers of 1024) or KB,MB,... (powers of 1000).
-- MOST: *stdin*                                                    (161,1)65%
Press `Q' to quit, `H' for help, and SPACE to scroll.
